

Management of administrative sanctions for violations of the Highway Code

NEED

Local Authorities must commit and act on the issue of road safety due to the impacts and implications, including social ones, that it has on the entire community. At the same time, they must sanction violations whilst countering the widespread attitude of hostility and, above all, act to improve security, including by using the proceeds of the sanctions. A substantial percentage of the resulting Revenues, in fact, is restricted to be used for the management, maintenance and control of the roads, for safety improvement and for educating citizens in behaviours well-suited to civil coexistence.

SOLUTION

Software and services which fully meet the needs of Local Authorities, covering not only the management chain of infringements of the Highway Code - and of all administrative sanctions in general - but also the obligations towards road accidents, the permit management for RTZ areas (restricted traffic zone), lost objects and road signage. Ancillary services that allow administering the many legal disputes generated with the sanctioning activity and offering solutions for road education.

JPOLIZIA MUNICIPALE (MUNICIPAL POLICE)

It is the module of the jENTE suite which manages the sanction process under the Highway Code. It allows, among other things:

- ▶ Single and/or multiple registration of fines
- ▶ Validation of the fines acquired by electronic equipment through the preview of the photographic image
- ▶ Online consultations through WebServices with the Department of Motor Vehicles and Public Vehicle Register for the individual recovery of vehicle owners
- ▶ Printout of fines on A4 form with automatic archiving in document folder of the original in PDF
- ▶ Massive remote signing service of the fines produced
- ▶ Recovery of Certified email (PEC) addresses from INI-PEC
- ▶ Notification via certified email addresses (PEC)

Litigation

Mass-produced preparation of counter arguments for the most widespread types of appeals and the possibility, with power of attorney from the Police Headquarters, to legally represent the Authority before the Small Claims Court

ADVANTAGES

- ▶ Possibility of analysing territorial data on sanctions and accident rate
- ▶ Monitoring parking areas to be checked
- ▶ Complete management of the sanction process quickly and effectively
- ▶ Real-time checks of information useful for the control process
- ▶ Consultations and online communications by the sanctioned subjects

SMART FINES

It is a native Android APP created specifically to be a daily work tool for investigating agents.

It is possible:

- ▶ To verify in real time information useful for the control process, thanks to the integration with the central platform
- ▶ To quickly issue sanctions for violations of the Highway Code or other violations
- ▶ To attach photographic evidence, notes and GPS position, documents to the dispute
- ▶ To manage payments on the road
- ▶ To receive alerts for the parking areas to be checked
- ▶ To send reports within the urban area

Municipia,

a company of the Engineering Group, is the partner for the digital transformation of cities of all sizes. It provides the best technologies and creates services through private investments, absorbing the operational risk.

MUNICIPIA - AUGMENTED CITY

Mission

- ▶ We manage services for Authorities and their citizens, achieving greater levels of efficiency, effectiveness, transparency and sustainability through digital technology. We also intervene with **public-private partnerships and project financing formulas** with investments and risks borne by us and participation in the benefits deriving from the increase in revenues and the decrease in costs.
- ▶ We add value to existing investments and technologies, making available our experience and the technological solutions of the Engineering Group. We intervene both with vertical initiatives and with cross-cutting projects in order to improve the quality of life in the city and to simplify the relationship between Public Administrations and citizens.
